

REMOTE SCAN-DIAGNOSTIC-PROGRAMMING TICKET REQUEST GUIDE

1.

CONNECTING

Connect the Elitek Scanning Device to OBD Port on Vehicle. When the two lights on the ethernet port are lit up solid green and orange, the device is ready to go.

Note* It can take 1-2 minutes for the lights to turn solid, as the scanning device is updating any firmware updates.

LOGGING IN

Use your pre selected username (email) and password to log into the Remote Service Center at: *customers.elitekauto.com*

WIFI

The Wifi symbol next to your connector number will be Green. Click on right arrow >

VIN DETECTION

The VIN should automatically be detected through to the service center. If there is no Vin # detection, you will have to manually enter the VIN #. Then click Next >

VEHICLE INFORMATION

Fill in all of the Vehicle information. Brand, Model, Type, Motor. Click Next >

NEXT STEPS

Click on the right button Assistance, Common Faults, and Remote Diagnostics Support
