

REMOTE DIAGNOSTICS

REMOTE PORT SETTINGS

ELITEK VEHICLE SERVICES SCAN TOOL

If using Wi-Fi your network must be running the 2.4ghz band.

- If using Ethernet connection, you must use high quality CAT5-E or CAT6 cable.
- If you're unsure if you may have ports blocked, you can use this link to check your port settings <https://portscan.obd.help:46329/>

TCP/UDP PORT SETTINGS

For a correct operation of the ELITEK application you are advised to perform following TCP/UDP port settings in your WiFi router. *Open outgoing TCP/UDP ports:*

MANDATORY

- 443 user interfacing
- 8080 user interfacing
- 10001 user interfacing
- 46329 (CAN Bus data -AES encrypted)

ALTERNATIVELY IF PORT 46329 FAILS

- 80 (optional, port 80 is fall-back for port 46329, CAN Bus data - AES encrypted)
